Sir:

Second Interview Summary And Draft Amendment For
Further Discussion

On April 26, 2007 Carl R. Schwartz discussed the above application further with the Examiner. The following points were noted in that discussion (and in a brief further communication by the Examiner):

1. The Examiner suggested that Fig. 12B would be an acceptable preferred picture (e.g. for a gazette notice). Applicants have no objection to the use of Fig. 12B for that purpose.
2. The Examiner indicated that his intention during earlier discussions with respect to claim 3 was to also withdraw the earlier indication of allowance and to require the pore size and pyrethrum limitations (as now proposed for claim 1) to reinstate allowance of claim 3. Hence, Applicants now propose to make those additional changes.
3. The Examiner agreed to claim 6 now being made dependent on claim 1 (in view of the cancellation of claim 2).

4. The Examiner inquired whether the intention with regard to claim 20 was to provide another dependency (given the duplicative content of amended claim 11). Hence, it was agreed that claim 20 could now be made dependent on claim 3.

5. The Examiner indicated that with these changes he would be willing to proceed to enter the amendment via an Examiner's amendment and allow the case. Applicants request that this be done.
